Publishing Your Add-on

You've built your first add-on. What started out as an idea or an experiment is now a polished widget ready to be sold to the world. Now all that remains is to publish your add-on and in this article we are going to help you do that.

But first...

We have created a set of documents to help you through the publishing process. Following the publishing checklist and filling out the Publishing worksheet will ensure you have all the info you need for the publishing process. We have also created a psd (photoshop file) that will resize and export your marketing assets.

Check List: Click here to download a PDF of the checklist.

- 1. An Email address that can be used by Adobe to contact you directly.
- 2. An email address for your products Customer Support.
- 3. Publisher Name: the name that will appear on all your products.
- 4. About: a few paragraphs describing your company.
- 5. Your **Twitter Handle** for the Adobe Exchange social media to follow.
- 6. A **Twitter Hash Tag** for the Adobe Exchange social media to follow.
- 7. Create a **Title** for the product you are creating.
- 8. You will need both a **Summary** and a full **Description** of your product (a few paragraphs is fine).
- 9. Decide whether your products **Purchase Type** will be **free**, **perpetual** (one-time purchase) or **subscription** based.
- 10. If you select **Free**, your content is offered as a Free product, or is shared privately; users can download and install it without making any payment (You can upload more than 2 paid products only if you have a subscription to the Adobe Exchange Portal).
- 11. If you select **Perpetual**, the user will have to pay a one-time fee in order to obtain your product.
- 12. If you select **Subscription**, you can choose for your product subscription fee to be charged monthly or annually.
- 13. The Adobe Exchange site offers **Tags** for your product. Select tags from the sites predefined list, then add your own tags (each tag separated by a comma, space or semicolon).
- 14. **Installation Instructions** are for the end user to explain how to get to your product and install it. Here are a basic set we have created:
 - Where to find it
 - By default your download will be in Userfolder > Downloads.
 - If the file is a ZXP file, right click or cmd click the file and select Open with > Adobe Extension Manager.
 - Follow the onscreen instructions to install the file.
 - Open Muse then open any Muse site or create New Site.
 - Double click into any page on the Muse site (to access the tool bar).
 - Click on the Library in the Tool Bar click Window > Library from the main Menu.
 - Click Import Muse Library (icon at the bottom of the Library panel, second icon from the right).
 - · Navigate to the widget file (usually in downloads) and select it.
 - Your new library items will now appear in the library panel.
 - · Click and open your selected widget folder in the library panel.

- Select the widget and drag it onto the page.
- 15. **Release Notes:** Use this section to describe important features, fixes and updates that your product contains.
- 16. **Notes to Approver**: If your product contains or uses encryption or any special instructions you would let the Adobe Approval team know about them here.
- 17. You can download our **Marketing Assets** psd here URL. Below is a list of the assets below is a breakdown of images needed for Marketing Assets:
- 18. One high quality jpg or png to use as your products icon 60px X 60px (smaller the .4m).
- 19. One high-quality jpg or png promotional image that can be used if your add-on is selected to be a featured product 195px X 160px.
- 20. Up to 5 images that can be used to market your add-on (screen shots e.t.c.). Images can be jpg or png 331px X 331px.
- 21. Your product: if your product is only one file you can upload it directly. See below for multiple file options:
- 22. Use the Adobe Exchange website to package your files.
- 23. Use the Adobe Exchange Packager stand-alone software to package your product. URL

Update Your Profile

• Go to the Adobe Exchange website: https://www.adobeexchange.com/

Twitter

The third section of the Account page allows you to integrate with Adobe Exchange's social media presence. The Adobe Exchange Twitter account will follow the Twitter handle and hashtag you enter. Adobe Exchange tweets about every new product that you publish which is pretty impressive.

- Click on the **Edit Details** button on the Twitter panel.
- Enter your Twitter Handle (just text, no need for the @ sign). (CL#5)
- Enter the **Twitter Hash Tag** (just text, no need for the # sign) that you use to connect your companies products. (CL#6)
- Click the Save Changes button.
- Now you will go back to the main **Account** page.
- To set your Twitter to follow Adobe Exchange (we highly recommend this), click on the Follow @adobeexchange button then follow the on screen instructions.
- If you choose to Follow @adobeexchange, you get tweets about new product publications,
